Identity:

Dennison Bertram, Seth Feibus, 2019

A wallet as a contract,

And a first class citizen.

A tool for Developers.
A blessing for users.

Portability
Less Friction

Flexibility
Privacy
Users need: Peace of Mind.

Portability

Users can move identities between wallets. Accounts can be throwaways or permanent. Ownership is individual or group.

Less Friction

Security

Flexibility

Privacy

Peace of Mind.

Less Friction

Meta transactions allow for smooth user experiences. Without gas, or even needing a wallet.

Portability

Security

Flexibility

Privacy

Peace of Mind.

Security

Identities can be counterfactually created with create2. On-chain cold-wallets with Gnosis Multisig for protection.

Portability
Less Friction
Flexibility
Privacy
Peace of Mind.

Gnosis Multisig brings the flexibility of Social Recovery, backup keys, advanced permission structures, and account linking.

Flexibility

Portability

Interacting with Ethereum
can be scary for new users.

Building a web3 application
for new users is even scarier.

Peace of Mind.

Thank you!
